NP Photonics, Inc. Awarded Aerospace Contract

NP Photonics, Inc. today announced that it has been awarded a multi-million dollar, two year product development contract by an undisclosed, strategic customer in the aerospace sector.

“We are delighted that NP has been chosen as partner in this development program” said Terry Hannon, president and CEO of NP Photonics, Inc. “The unique narrow linewidth performance and industry-leading ultra-low noise signature of our Rock™ lasers continue to create new high-growth market opportunities, in this case in the aerospace industry.”

The technology that will emerge from this program although customized for a high-volume confidential aerospace application, will also address the demanding requirements of the Acoustic Sensing market.

About NP Photonics, Inc.

Founded in 1998 NP Photonics Inc. is a leading manufacturer of fiber lasers for the sensing, metrology and research markets. The NP Photonics proprietary fiber technology is used across a broad family of products including narrow line-width, low phase-noise fiber lasers specifically designed for operation in an industrial environment. With over 1000 lasers installed worldwide NP continues to grow through technology development, planned product introductions and engagement with markets in which the company has a clear sustainable advantage. NP Photonics, Inc. is an ISO 9001:2008 registered company.
