NP Photonics Names New Vice President of Sales and Marketing

NP Photonics (Tucson, AZ), a leading innovator of advanced micro fiber products for sensing and scientific applications, has named Philippe Brak its new vice president of sales and marketing. Brak joins NP Photonics from Gigabit Optics where he served as vice president of sales and marketing for the optical telecommunications component company.

Prior to his tenure at Gigabit Optics, Brak spent 16 years with Spectra Physics where he held numerous positions, including vice president and general manager of the company's OEM business unit. He holds a Masters in Chemistry from Catholic University of Leuven.

Brak brings strong international expertise to the company. He is known as a strong leader, who has built successful sales and marketing teams serving global markets in a variety of industries.

"Philippe has a vast amount of knowledge and experience in the worldwide photonics market," said Chuck Chandler, CEO of NP Photonics. "His leadership and expertise in OEM sales will help us further establish our sales and marketing network as our products find wider acceptance in the sensing and scientific industries."

Founded in 1998, NP Photonics has leveraged its expertise in advanced micro fiber technology to design and manufacture a unique line of compact and low-cost fiber laser modules, benchtop systems and broadband ASE sources. These products have found applications in fiber sensing, defense, telecommunications and scientific research.
